Five Ways to Improve your Interoperability Life

1. If you want better interoperation have fewer interfaces

Five Ways to Improve your Interoperability Life

1. If you want better interoperation have fewer interfaces

2. Look for standards from a few chest-thumping baboons rather than a thousand screaming monkeys

Five Ways to Improve your Interoperability Life

1. If you want better interoperation have fewer interfaces
2. Look for standards from a few chest-thumping baboons rather than a thousand screaming monkeys

3. For better interoperability narrow the scope of collaboration

Five Ways to Improve your Interoperability Life

1. If you want better interoperation have fewer interfaces
2. Look for standards from a few chest-thumping baboons rather than a thousand screaming monkeys
3. For better interoperability narrow the scope of collaboration
4. Expect to use and manage shims until proven otherwise

(Rim Shot)

5. Live by Gall's Law

A complex system that works is invariably found to have evolved from a simple system that worked.

5. Live by Gall's Law

A complex system that works is invariably found to have evolved from a simple system that worked.

A complex system designed from scratch never works and cannot be patched up to make it work. You have to start over with a working simple system.

5. Live by Gall's Law

A complex system that works is invariably found to have evolved from a simple system that worked.

A complex system designed from scratch never works and cannot be patched up to make it work. You have to start over with a working simple system.
